DETAILED ACTION
Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a ballast for a discharge lamp and operating method thereof having, inter alia, a voltage feedback circuit that provides a sinusoidal feedback signal from a resonant inverter into a timing circuit for synchronization of said timing circuit and said voltage feedback circuit including a phase shift circuit that attenuates and selectively shifts a phase of an output voltage from said resonant inverter (claims 1 and 9). The remaining claims 2-8 and 10-14 are allowed by virtue of their dependencies on the independent claims. Hence, the examiner has allowed claims 1 through 14.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
